

Whitehorse Yukon

\$919,000

Small details, huge impact! A family home built with zero sacrifices, including its location that sits next to the Yukon River trails and backing onto green space. This 5 bed, 3 bath executive build sits on a concrete foundation, built with QUALITY in mind: solid birch cabinetry, solid-surface counters, and a spa-style ensuite w/ freestanding soaker tub. Other highlights include a bright main living space, main floor bedroom/office & bathroom with shower for guests, expansive 5th bedroom (2nd living room option), and large upper laundry w/ sink. Worried about heating this size of home? The builder thought of that too, with a dual-zone arctic heat pump. Outside also ticks all the boxes: side yard RV parking, attached garage door w/ EV rough-in, and striking LP beige siding with black windows and black garage door. Beautiful and built with integrity, the full package!
