

Edmonton Alberta

Windermere

\$169,900

Legally a 2-bedroom unit, but functionally, this works much better as a 1-bedroom with a huge den and 2 full baths! This ground-floor condo is ideal for anyone looking for affordable Southwest Edmonton living with space all to themselves. Not everyone loves ground-floor living...but the people who do REALLY do, and this one has a huge advantage: parking right outside the patio for easy in/out access. Visitor parking is right there too, and being able to come and go directly through the patio adds so much convenience to everyday life - especially for dog owners, grocery runs, or having friends stop by. This building has no amenities, which helps keep the condo fees lower (and let's be honest, most people rarely use them anyway). If you are looking for a low-maintenance, practical home in a desirable Windermere location, close to shopping, restaurants, and walking trails, this is a smart and affordable entry into home ownership with space where it matters.
