

332 WILLIAMS Crescent Prince George British Columbia
\$439,900

When location, space, a large kitchen and a great backyard are the boxes to check, then this is the house to consider first. It backs onto green space high above the Fraser River, and only a short walk or drive to all sorts of city amenities. The kitchen was updated and features an abundance of cabinet space, tile floors, and a big bay window overlooking the back yard. Speaking of the yard -it features a large sundeck with a gazebo and a concrete patio area. Best of all there's nobody behind you. Automatic sunshades on the front windows help regulate the summer heat. The basement will appeal to people that enjoy a 1960/70's aesthetic and even comes with a wet bar. Outside basement entrance.
