

347 Braeloch Road Kelowna British Columbia

Upper Mission

\$3,789,000

There's a quiet magic to this home - the way it settles into its surroundings & the way every space feels connected to the lake. Set in one of Kelowna's best neighbourhoods with the best lake view setting, this one owner home draws subtle inspiration from Frank Lloyd Wright's Prairie design, blending natural materials, clean lines & a deep sense of warmth. Designed as a coveted two-storey walk-out, the main level opens effortlessly to the outdoors where a concrete & tile pool, sunken hot tub & thoughtfully designed landscaping create a setting that feels more like a private resort, all framed by front row unobstructed lake views. Inside, expansive windows invite in natural light, while Kettle Valley stone, oak hardwood & custom millwork create a grounded, welcoming feel. The great room is anchored by a statement stone fireplace, while the kitchen features a generous island designed for gathering. The main level primary suite is a lake view sanctuary of its own, with spa-like finishes & boutique style closet, while upstairs bdrms each enjoy their own ensuite. Upper level also offers a family room space & office space while the main level features a guest bedroom/den. The lower level of the home features a very rare offering - a fully equipped 1500sqft Collector's Shop with parking for 4-6 additional vehicles. Accessed by a 7000lb hydraulic elevator lift complete with radiant...
