

Whitehorse North Yukon

\$739,000

Location with potential for someone wanting to complete a partially built home on five country acres north of Whitehorse. Spectacular mountain views that even capture glimpses of Lake Laberge. This two storey home has 1861 sq feet above grade with a 1041 sq ft walk out basement. The plans allow for 3-4 bedrooms, 3 bathrooms, a centrally located kitchen with dining and living area at one end with lots of windows to capture views. You can live in the small two story cabin constructed in 2018 that has final occupancy as a dry cabin, or continue to rent it at approx. \$1,400/mo. The large shop on the property has two large overhead doors from one side with another bay for vehicle or toy parking. The shop would be ideal for construction phase, storing of building materials and has the capacity to store boats, RV's, extra vehicles. Are you up to finishing the dream? (id:6769)
