

5567 OONA Road Fraser Lake British Columbia
\$925,000

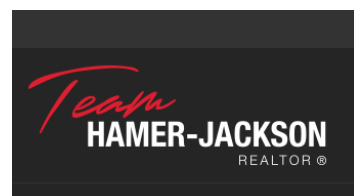

93.7 beautifully treed acres with over 1800 feet of shoreline on Fraser Lake. The property has a gorgeous and clean pebbled beach and is known by locals as Fisherman's Point, with both SE and SW exposure. There is a generous amount of timber value, to be determined by a buyer, with some old growth and some regen that could be harvested now, or will be more mature in about 10 years. The land offers a mixture of majestic fir trees, mature spruce, some pine, birch and even several juniper bushes and mountain ash. There are a few areas on the property that offer spectacular lake views that would make beautiful homesites, plus 2 natural springs, and a previous (now uninhabitable) home that had power connected.
